Chapter 1. Introduction into the Unified Modeling Language (UML) .....	5
What is UML? .....	5
Notations and metamodels .....	7
Chapter 2. Use Case Diagram .....	10
Content precedents .....	10
Use Case Diagrams .....	12
Levels precedents .....	13
Precedents and opportunities (or suggestions) .....	13
Chapter 3. Class Diagram .....	16
Program interpretation of the properties .....	19
Bidirectional associations .....	21
Operations .....	22
Chapter 4. Sequence Diagram .....	28
Creating and removing members .....	28
Loops and conditions .....	31
Chapter 5. State Diagram .....	35
Internal activity .....	36
Activity states .....	36
Superstates .....	37
Parallel states .....	37
Chapter 6. Activity Diagram .....	40
Decomposition of operation .....	41
Areas of expansion .....	44
Ending the flow .....	45
Chapter 7. Component Diagram. Deployment Diagram .....	48
Elements of component diagram .....	48
Elements of deployment diagram .....	49
Chapter 8. Software development process .....	52
Processes iterative and waterfall .....	52
Predictive and Adaptive Planning .....	54
Agile processes .....	56
Setting up the process for the project .....	57
Chapter 9. Class Diagram: additional concepts .....	63
Keywords .....	63
Aggregation and composition .....	64
Interfaces and abstract classes .....	66
The objects and objects of value links .....	68
Association class .....	72
Template class (parameterized class) .....	75
Chapter 10. Object Diagram. Package Diagram .....	80
Elements of object diagram .....	80
Elements of package diagram .....	81

Chapter 11. Communication Diagram. Composite Structures. Cooperations .....	88
Elements of communication diagram .....	88
Cooperations .....	90
Chapter 12. Interaction Overview Diagram. Timing Diagram.....	94
Elements of Interaction Overview Diagram .....	94
Elements of Timing Diagram .....	95
