<b>Preface</b> .....	5
<b>I. Lectures</b> .....	7
Lecture 1. Subject of probability theory. Events and operations on events. ....	7
Lecture 2. Definitions of probability. ....	14
Lecture 3. Additive rule. Conditional probability. Product rule. ....	21
Lecture 4. Independence of events. Bayes formulas.....	28
Lecture 5. Bernoulli scheme. Polynomial scheme. ....	35
Lecture 6. Asymptotic formulas of Bernoulli scheme. ....	42
Lecture 7. Random variables (finite case). ....	49
Lecture 8. Numerical characteristics of random variables. ....	55
Lecture 9. Random variable (general case). ....	62
Lecture 10. Characteristic functions. ....	70
Lecture 11. Large numbers law. Central limit theorem. ....	75
Lecture 12. Population and sample. ....	80
Lecture 13. Point estimators of parameters. ....	13
Lecture 14. Interval estimators of parameters. ....	93
Lecture 15. Statistical hypotheses testing. ....	97
<b>II. Practical lessons</b> .....	103
Practical lesson 1. Simplest probabilistic problems.....	103
Practical lesson 2. Classical definition of probability.....	105
Practical lesson 3. Classical definition of probability (part 2). ....	108
Practical lesson 4. Conditional probability and independence.....	109
Practical lesson 5. Sum and product formulas. ....	111
Practical lesson 6. Bayes formulas. ....	113
Practical lesson 7. Bernoulli scheme. ....	115
Practical lesson 8. Simple random variables. ....	116
Practical lesson 9. Numerical characteristics of random variables. ....	117
Practical lesson 10. Joint distributions. ....	119
Practical lesson 11. Continuous random variable. ....	120

Practical lesson 12. Types of distributions. ....	121
Practical lesson 13. Chebyshev's inequality. Large numbers law. Central limit theorem.....	122
Practical lesson 14. Sample characteristics.....	124
Practical lesson 15. Parameter estimators.....	125
<b>III. Individual work of students (IWS) .....</b>	<b>127</b>
IWS №1. The simplest problems of probability theory.....	127
IWS №2. Geometric definition of probability. Sum and product formulas. ....	129
IWS №3. Bayes formulas +.....	132
IWS №4. Independent trials. ....	134
IWS №5. Discrete and continuous random variables. ....	138
IWS №6. Joint distribution of discrete random variables. Mathematical statistics elements. ....	142
<b>IV. Final exam program .....</b>	<b>146</b>
<b>References .....</b>	<b>149</b>
